Corporate Profile

Translation

Human Translation

This is KI's high quality human translation service that the company has provided and refined over the 30 years it has been in business. If you are looking to translate highly technical documentation, then human translation by professionals provides the ultimate peace of mind.

Machine Translation (inc. Post-editing)

If your budget and deadline are tight and you want a quick translation at low cost, then machine translation is an effective solution. KI can provide the optimum solution to fit your needs, such as support for implementation of automatic translation using Google or Microsoft products, sales of a range of translation engines, or linking with translation support tools. We can also provide a post-editing service for projects where you need higher quality than that provided by machine translation alone.

Web Services

KI provides a variety of web services that combine language and technology. We particularly recommend these services to customers who want to take advantage of the demand created by overseas visitors and other opportunities created by inbound travel.

- ▶ On-demand translation (online) "Mail-kun"
- ▶ Website Globalization "Weblingual PLUS"
- ▶ QR code usage "QR Translator"

Other services

KI Philosophy

Mission

To leverage technology and aim to create new language services in order to contribute to our customers' business

Vision

To become a strong, great company that provides fulfillment to its employees and contributes to society

Values

Seek to deliver the solutions demanded by our customers
 Take on the challenge of change
 Always improve
 Always be professional
 Grow together with our partners
 Have fun

Quality

KI promotes the idea of Total Quality Management (TQM). Not only the accuracy of translation but also the process and communication are part of "quality." That is what KI believes.

Evaluation system development

A system for continuous improvement that aims to reduce errors in translation to zero.

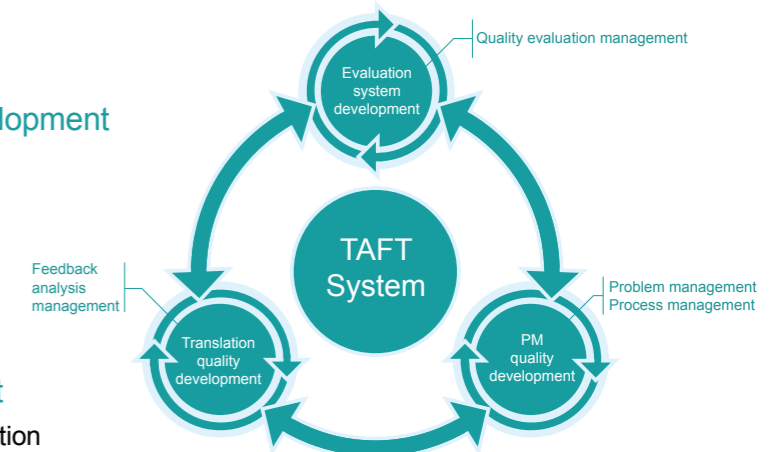

Translation quality development

A tool that incorporates customer needs and requests into translation specifications.

PM quality development

A framework for the optimization of project management quality.

Total Quality Management (TQM)
